INDEX TO VOLUME 48, 1997

AUTHOR AND TITLE INDEX

(Excluding *Book Selection* and *Viewpoints*)

Allan, G.:
(*see* Backhouse, P. G.)
Amiri, A. and Pirkul, H.:
New formulation and relaxation to solve a concave-cost network flow problem, 278
Amos, F., Rönnqvist, M. and Gill, G.:
Modelling the pooling problem at the New Zealand Refining Company, 767
Anandalingam, G. and Nam, K.:
Conflict and cooperation in designing international telecommunication networks, 600
Aris, J.:
(*see* Caminer, D.)
Armstrong, R., Gu, S. and Lei, L.:
Solving a class of two-resource allocation problem by equivalent load method, 818
Astin, J., Stewart, A. and McIntosh, E.:
Economic evaluation of chronic conditions: framework for a quasi-Markov process, 623
Athanassopoulos, A. D. and Podinovski, V. V.:
Dominance and potential optimality in multiple criteria decision analysis with imprecise information, 142
Athanassopoulos, A. D.:
(*see* Sarrico, C. S.)

Backhouse, P. G., Fotheringham, A. F. and Allan, G.:
A comparison of a genetic algorithm with an experimental design technique in the optimization of a production process, 247
Bai, S. X.:
(*see* Wang, K-H.)
Baker, B. M.:
Cost/time trade-off analysis for the critical path method: a derivation of the network flow approach, 1241
Baltas, G., Doyle, P. and Dyson, P.:
A model of consumer choice for national *vs* private label brands, 988
Bard, J. F.:
An analysis of a rail car unloading area for a consumer products manufacturer, 873
Barzilai, J.:
Deriving weights from pairwise comparison matrices, 1226
Basnet, C., Foulds, L. R. and Wilson, J. M.:
A decision aid for milk tanker run allocation, 786
Beaumont, N.:
Using mixed integer programming to design employee rosters, 585
Benati, S.:
An algorithm for a cutting stock problem on a strip, 288
Bennett, S. C.:
(*see* John, R. I.)
Berman, O.:
Deterministic flow-demand location problems, 75
Bhunia, A. K. and Maiti, M.:
Deterministic inventory models for variable production, 221
Birbas, T., Daskalaki, S. and Housos, E.:
Timetabling for Greek high schools, 1191
Blokh, D.:
(*see* Golenko-Ginzburg, D.)
Bolat, A.:
Stochastic procedures for scheduling minimum job sets on mixed model assembly lines, 490
Bradford, J. W. and Sugrue, P. K.:
Estimating the demand pattern for C category items, 530
Brimberg, J. and Mehrez, A.:
A note on the allocation of queuing facilities using a minisum criterion, 195
Brockett, P. L., Cooper, W. W., Golden, L. L. and Xia, X.:
A case study in applying neural networks to predicting insolvency for property and casualty insurers, 1153
Brown, G. G. and Ronen, D.:
Consolidation of customer orders into truckloads at a large manufacturer, 779
Browne, J. C.:
(*see* Jain, R.)
Brusco, M. J., Thompson, G. M. and Jacobs, L. W.:
A morph-based simulated annealing heuristic for a modified bin-packing problem, 433
Buchanan, J. T.:
A naïve approach for solving MCDM problems: the GUESS method, 202

Capey, R.:
(*see* Kirby, M.)
Chae, K. C.:
(*see* Kim, T. S.)

CORRIGENDA INDEX

Carter M. W., Laporte G. and Lee S.Y.:
Corrections to: 'Examination timetabling: algorithmic strategies and applications', 225

Todoroki C. L. and Rönnquist E. M.:
Corrections to: Secondary log breakdown optimisation with dynamic programming, 1151

SUBJECT INDEX

(This index includes all *papers* and *viewpoints*))

Absorbing Markov chains 1215
Acquisitions 678
Activity network 175
Additive model 446
Age distribution 843
AHP 1226
Airport terminal 124
Algorithms 1045
Allocation 195, 401, 1029, 1201
Alternative activity network 391
Alternative operations 533
Ant algorithm 295
Artificial intelligence 162
Assessment 1082
Assignment 295, 804

Backtracking 412
Behavioural 202, 988
Bicriterion 929
Bilevel programming 943
Bin Packing 433
Bounds 511
Branch-and-bound 57, 533

Capacity selection 278
Case study 1153
Cash flow modelling 906
Cellular network 1076
Chance constraint 175
Clique partitioning problem 1076
Cognitive mapping 1065
Collective performance 295
Combinatorial analysis 629
Combinatorial optimization 612
Compensation 1215
Computational complexity 502
Computers 401
Construction project 175
Conflict analysis 132, 423, 978
Constraint-based reasoning 1178
Constraint satisfaction problem 1178
Consultancy 336, 1045
Consumer choice 988
Control 457, 936, 965, 1113, 1260, 1261
Convex analysis 1001
Cooperative games 600
Cost 623, 810, 936, 1260, 1261
CPM 1241

Critical systems 453, 454, 741
Cutting stock problem 288, 324

Data envelopment analysis 51, 142, 319, 446, 591, 892, 1001, 1163
Decision aid 786
Decision analysis 383, 423, 457, 623, 714, 965, 1226
Decision making 943
Decision support systems 1065
Defence studies 383, 457, 965
Delay 826
Demand 221
Demand covering 75
Dependability 629
Deterioration 826
Deterministic location problems 75
Discriminant analysis 678
Distribution 107, 241, 726, 973, 1029, 1057
Dominance 142
Dynamic programming 162, 324, 471, 1151

Econometrics 15
Economics 623
Edge-colouring 100
Edging 471, 1151
Efficient algorithm 818
Efficient facet 591
Eigenvector method 1226
Emancipation 453, 454, 576, 741
Emergency 996
Empirical study 988
Energy 361
Equivalent load method 818
Euclidean distance 950
Evaluation 1082
Evolutionary method 295
Experimental design 247
Exchange rate 1131
Expert systems 1065

Facilities 195
Facility location 1233
Factor analysis 678
Financial ratios 678
Fisheries management 1095
Flexible manufacturing systems 264
Flow covering 75

Flowshop scheduling 212, 533
Forecasting 15, 530, 700, 1215
Forest products 471, 1151
Foucault 453, 454, 741
Fractional programming 25
Fuzzy logic 117
Fuzzy sets 25

Gas 15
Game theory 423
Generalised assignment 804
Generation 423
Genetic algorithms 247, 440, 612, 804
Geometric mean 1226
Global networks 600
Goal programming 319
Graph colouring 295
Greedy randomised adaptive search procedure (GRASP) 573, 873

Habermas 741
Health service 623
Heuristics 34, 100, 107, 151, 162, 212, 241, 264, 278, 288, 324, 373, 433, 490, 502, 612, 629, 640, 736, 751, 786, 804, 834, 950, 1057
Hierarchical 207
Higher education 1163
History of OR 10, 336, 555, 661
Hospitals 884
Hypergame 423

Independent set 612
Industry 569
Infinite horizon model 1095
Information technology 1082
Information theory 383
Inspection point 175
Insurance insolvency 1153
Integer programming 264, 647, 1191
Integration 423
Interactive 943
Inventory control 184, 221, 375, 530, 546, 547, 550, 700, 826, 1013, 1022, 1029, 1245
Investment 184

JIT production 375
Job-shops 647
Joint efficiencies 51
Joint variant 391
Just-in-Time production 546, 547, 550

Knapsack 324

Lagrangian heuristic 1233
Lagrangean relaxation 278, 373
Lexicographically ordered vector 391
Linear independency 591
Linear programming 25, 90, 202, 314, 714, 1001
Location 75, 479, 745, 996, 1076
Location allocation 745, 950
Logistics 375, 546, 547, 549, 726, 779, 810
Logistics management 107
Logit 678
Low and intermittent demand 700
Lower bounds 490

Machine location 412
Maintenance 184, 688
Management 229, 793, 857
Management development 373
Manpower planning 585
Manufacturing policy 1131
Marketing 988
Marketing policy 1131
Markov process 1022
Materials planning 519
Mathematical programming 1095
Mean tardiness 751
Mergers 678
Metamodel 1105
Methodology 132, 336, 576, 623, 978
Microcomputer applications 786
Military 132, 457, 965
Milk tanker scheduling 786
Minimizing tardy jobs 212
Misperception 423
Mixed integer programming 585, 873
Modelling 132, 184, 264, 623, 767, 978, 988, 1191
Morality 576
Multi-objective 202, 714, 943
Multicommodity flow 278
Multiple criteria decision analysis 90, 142
Multi-product Flowline 412
Multivariate statistics 678

Nature of operational research 1045
Net benefit of relocation 640
Net present values 1123
Networks and graphs 34, 107, 373, 502, 793, 857, 1241
Neural networks 919, 1105, 1153
Newsboy problem 1245
Non-convex programming 479
Non-cooperative games 600
Non-divisible network 391
Non-linear programming 51, 767, 1029
Nonlinear cost 278

OR Groups 336, 361
OR Management 3, 361
OR practice 361

OR Society 3
Obnoxious facility 479
Off-line quality control 247
Oil 767
On-line control 175
Operational competiveness rating analysis 892
Optimisation 25, 107, 184, 247, 264, 306, 440, 471, 767, 779, 810, 919, 1029, 1105, 1151
Optimum 950
Organizational studies 336

P-median 950
Paced line 490
Packing 726
Pallet loading 726
Parallel computers 100
Parallel flow-shop 834
Payment 826
Performance measurement 319, 892, 1163
Periodic review 700
Perturbation heuristic 1233
Planning 1065
Police 996
Post-modernism 453, 454, 741
Potential optimality 142
Power 576
Practice of OR 3, 336, 569, 767, 779, 810
Probability 65, 255, 996
Production 97, 221, 647, 1013, 1105
Production planning 207
Productivity 1082
Professional 336
Progress payments 1123
Project management 34, 736, 906, 1241
Project scheduling 1123
Purchasing 375, 546, 547, 549

Queueing 124, 195, 306, 810, 936, 1113, 1260, 1261

Rail car unloading 873
Rail transport 151
Random lifetime 1022
Rates of change 591
Real-time decision problems 162
Recoverable manufacturing 519
Refereeing (1996) 552
Regression analysis 319, 678
Relative interior 591
R-unloaders 810
Reliability 401, 688
Remanufacturing 519
Rendezvous search 44
Repair 184
Replenishment 826
Responsibility 576
Resource constraints 1123
Reversed process 843
Reversibility 843
Risk 255
Rostering 124

Safety stocks 519
Sales force 1215
Satellite communications 100
Savings 57
Sawing 471, 1151
Scheduling 100, 151, 264, 373, 533, 629, 640, 647, 834, 873, 884, 906, 929, 1201
School timetabling 1191
Search 736
Selective travelling salesperson problem 511
Self-organising 919
Semi-Markov process 843
Sensitivity analysis 412
Sequencing 490, 640, 834, 1201
Series-parallel graphs 818
Service 936, 1260, 1261
Service constraints 1022
Set-up 306
Set covering problems 440
Shipping 688
Shortage 826
Shortest path problems 314
Simple recourse 207
Simulated annealing 433, 490, 884
Simulation 34, 44, 65, 124, 151, 623, 810, 1057, 1105
Single machine scheduling 82, 640, 751
Skips 57
Slitting problems 314
Social issues 1045
Soft OR 229
Soft Systems Methodology 229
Software 401
Sports 65
Stackelberg game 943
Staffing 124
Stages 936, 1260, 1261
Station breakdowns 936, 1260, 1261
Statistics 530, 1029
Stochastic demand 1245
Stochastic linear programming 207
Stochastic processes 391, 1013
Strategic planning 793, 857
Systems 255

Tabu search 745, 751
Taiwan 569
Tardiness 82, 640
Tariffs 1131
Telecommunications 100, 600

Time series 90
Timetabling 1178, 1191
Tournaments 65
Transport 107, 241, 1057, 1065
Transportation problem 57
Travelling salesman 502, 919
Trend estimation 90
Trimming 471, 1151
Two-machine flowship 929
Two-resource allocation 818

Use of OR 569

Vehicle allocation 786
Vehicle brokerage 117
Vehicle dispatching 162
Vehicle routeing 57, 107, 973

Water 15
Weights restrictions 142
Workforce scheduling 585
World War II 555, 661

Zero-one integer programming 511
